- Non-repetitive voltage: Up to 850 V_p
- Opto-isolation: > 4000 VACrms

Product Description

The zero switching relay with alternistor output is an inexpensive solution for resistive loads. The zero switching relay switches ON when the sinusoidal curve crosses zero and switches OFF when the current crosses zero. The

LED indicates the status of the control input. The clip-on cover is securing touch protection (IP 20). Output terminals can handle cables up to 16 mm².
